Kanban
Kanban (the Japanese word for "visual signal") is all about helping teams visualize their work, limit work currently in progress, and maximize efficiency. Use the Kanban template to increase planning flexibility, reduce bottlenecks and promote transparency throughout the development cycle.
Track work using a simple board
Work items are represented visually on your kanban board, allowing teams to track the status of work at any time. The columns on your board represent each step in your team's workflow, from to do to done.
Learn more about kanban boards
Use the board to limit work in progress
Set the maximum amount of work that can exist in each status with work in progress (WIP) limits. By limiting work in progress, you can improve team focus, and better identify inefficiencies and bottlenecks.
Learn more about WIP limits
